

ALEKSANDAR MASLIC

WEB DEVELOPER

Profile

Web developer working with multiple Javascript frameworks (Extjs, Aurelia, Angular, React). Using Laravel for the backend of my applications. Heavy involvement with WordPress development and customizing plugins. Have experience with C# and good knowledge of Java, MySQL, GitHub, Docker, and Kubernetes. Always looking for opportunities to learn new things (not only in programming).

Experience

- 2018 - Present** **Develabs**
Web developer, Banjaluka
Developed many features for Jedox software. Using Ext JS on the frontend side and for the backend Java and PHP.
- 2012 - Present** **Upwork**
Freelancer
In these few years, I developed some nice web and mobile applications. Learned a lot of new skills, like Laravel, Angular 2+, etc.
Most of my clients recommend me for hiring (84%) and 50% of them were long term clients.
- 2016 - 2016** **Scytotech**
Frontend Developer
It was a remote position. Worked on web-based applications using Laravel and Bootstrap, with Ajax calls to backend side.
- 2015 - 2016** **Elephant Solutions**
Frontend Developer, Bijeljina
Developed few applications using Angular 1 and also worked on WordPress and Prestashop sites.
- 2014 - 2015** **TMX**
Frontend Developer
Worked remotely and developed a great application for dentists. It was Phonegap application.
